

SOCIAL AND OCCUPATIONAL INCLUSION

OF ADULTS AND MINORS SUBJECT TO JUDICIAL PROCEEDINGS

The Basilicata Regional Authority encourages and promotes the access to social and occupational inclusion of adults and minors subject to judicial proceedings all over its territory.

This action, provided for by Axis III – Social Inclusion – of the O.P. E.S.F. Basilicata 2007-2013, aims at developing paths for the social integration and occupational rehabilitation of disadvantaged persons, referring especially to prisoners, in order to oppose any kind of discrimination in the labour market.

The lines of intervention make it possible to develop:

- counselling, through the institution of a Case Management Service which provides guidance, assessment and counselling;
- education, by encouraging school attendance and giving vouchers to deserving people;
- training, through interventions of basic training (such as professionalizing courses, multi-purposes workshops, etc.) as well as specialized training;
- occupational rehabilitation, through contributions aiming at job placement and financial incentives for companies and social cooperatives in order to encourage them to employ adults and minors subject to judicial proceedings;
- system interventions, through an informative campaign and the operators' training.

Companies, Social Cooperatives, Training Agencies and Bodies will be included.

Such interventions, aimed at developing the personal and social empowerment of adults and minors subject to judicial proceedings, aspire to a decrease in the deviant relapse so as to make the territory "safer" and cut the social and financial "maintenance" costs of the Judicial System users.

These Lines of Intervention have been elaborated in cooperation with the Ministerial Local Superintendency for the Penitentiary Administration and the Calabria and Basilicata Centre for Juvenile Justice. They are in agreement with the guidelines promulgated by the Ministry of Justice.

The sum of € 8,840,000 has been allocated for the 2010-2012 period.
